## **AQILLA READY FOR WINDOWS 7 DEPLOYMENT**

*Web-based accounting software tested and compliant ahead of new OS launch*

Aqilla, the online accounting software solution provider, today announced that it is Microsoft Windows 7 ready. The Aqilla solution has been rigorously tested and works well with both Microsoft and third-party browser products under the new operating system, which is available from October 22, 2009

This latest version of Microsoft Windows offers full 64-bit support, which provides improvements in performance power options management and easier wireless networking. At its core is Internet Explorer 8. It is thought that many enterprises that had avoided upgrading to Vista will be eager to move from ageing Windows XP, which is in effect no longer supported.

Hugh Scantlebury, director at Aqilla, said: "We certainly think that Windows 7 is a major step forward for PC users and have ensured that our technology will work seamlessly with this new operating system. Due to requests we have fully tested the two technologies working together to ensure customers and prospective users will not encounter any issues as their organisations upgrade."

An Aqilla Pro subscription is priced at £50 (excl. VAT) per user per month; data entry users for straightforward entry and capture of timesheet and expense documents are charged £10 (excl. VAT) per user per month.

For more information about the company and its on-demand accounting application, visit [www.aqilla.com](http://www.aqilla.com).

## **About Aqilla Limited**

Aqilla Limited, founded in 2006, is the developer of web-based accounting solutions designed for small and medium-sized businesses and accountancy firms. The easy-to-use software utilises the latest open source toolsets based around Java and AJAX technologies to deliver Sales Ledger, Purchase Ledger, General Ledger, Cash Matching, Sales Invoicing, Purchase Invoicing and Time Management functions that can be accessed over the internet via a rich web browser interface. In addition, because it is delivered on-demand, Aqilla removes the need for high levels of capital outlay, as well as the ongoing expense of maintenance and management.
